

LUZUMI Ready-to-Install Checklist

Factory-Assembled Precision for Seamless Installation

Thank you for choosing LUZUMI, a customization leader with over 18 years of innovation in linear LED development. This system has been factory-assembled and tested to fulfill our promise of efficiency and maintenance-free operation.

Before beginning your installation, please verify the following:

1. Inventory & Specification Check

- **Verify Contents:** Confirm that all linear, task, or architectural fixtures match your project layout and billing.
- **Label Matching:** Ensure that each factory-labeled assembly corresponds to its designated architectural zone as per your provided technical review.
- **Warranty Verification:** Confirm that all products carry the LUZUMI 2–5 year warranty seal, ensuring long-term reliability.

2. Mechanical & Environmental Verification

- **Profile Integrity:** Inspect architectural and decorative profiles for any transit-related issues to ensure a clean, aesthetic fit.
- **Environmental Rating:** Ensure the product's IP rating (Landscape/Accent vs. Interior) matches the installation environment.
- **Mounting Hardware:** Confirm you have the correct LUZUMI-provided mounting clips or tracks for a secure, professional finish.

3. Electrical & Control Integration

- **Power Supply Planning:** Verify that your site's power supplies match the factory-assembled requirements of the LED products.
- **Control System Check:** Ensure the pre-configured system is ready for integration with your specified third-party lighting controls.
- **Polarity & Connections:** Double-check all factory-terminated wiring before applying power to protect the energy-saving technology.

Need Technical Assistance?

Our unwavering focus on customer service means we are here to support you through the final fulfillment stage of your project. If you encounter any challenges, our technical support team is ready to assist you in optimizing your installation.
